1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 18, drawn to power source structure, classified in class 324, subclass 765.
 - II. Claims 19 - 23, drawn to the method for controlling the power source, classified in class 324, subclass 754.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of controlling the powers source can be used to control other devices such as sensor, tester, and rectifier.
